

Weymouth Speed Week 2001

29th of September to the 5th of October 2001

Held at:

**Weymouth & Portland Sailing Academy
Portland Beach Road
Portland
Dorset
DT5 1SA**

Final Results

For further details visit: ***www.Speedsailing.com***

Or call Nick Povey on 01342 825392
or Bob Spagnoletti on 01992 581210

With special thanks for the continued support of the Amateur Yacht Research Society and it's members.

Thank you to Jonti of Grafham who donated the buoys that were used to such good effect this year.

Nick Beaney - Fastest of the week at 35.22 knots

Photo Bob Spagnoletti

Weymouth Speed Week is a unique sailing event.

The purpose of the week is to provide a forum for boats and windsurfers to obtain accurate speeds over a 500 metre course laid in Portland Harbour.

The event started in 1972 to lay to rest extravagant claims made by yachtsmen prior to that time about the speeds their boats could attain. However the event has provided a venue for unusual designs of boats made by the innovative people who are always pushing the boundaries of design.

Today the lack of rules for determining, seaworthiness, controllability, or practicality provide the ideal proving ground for both experts and dreamers to build the type of boats, which, but for Weymouth Speed Week would never see the light of day. There are NO restrictions as to who may enter and all types of sailing craft are welcome

Many boats and windsurfers have broken sailing speed records in Portland Harbour over the years culminating in 1980 when Crossbow attained a ratified speed of 36 knots, which was the record for Portland Harbour.

However last year Richard Jones a windsurfer recorded a speed of 37.03 knots over a 318-metre course. This is now the unofficial record for Portland Harbour.

Of particular note this year was Chris Calthrop who achieved a speed of 33 knots using a kite board over a 200 metre course laid off Chesil Beach.

When conditions permitted two courses were used this year, an offshore course of 500 metres and a shore course of 200 metres. This innovation proved very popular both for the boats and the windsurfers.

The absolute maximum speed record under sail has been raised many times since 1980 and is currently held by Yellow Pages, a boat designed by the Australian Lindsey Cunningham. The record speed of 46.52 knots was attained in 1993 at Sandy Point in Australia.

Acknowledgements

The Event is run with the co-operation of the Weymouth and Portland Borough Council and the Amateur Yacht Research Society and my friends who every year donate their time and effort to make the week run as smoothly as it does.

To the team I extend my heartfelt thanks for without them the event could not run.

Thank you to everyone who helped to make this week a success especially Norman Phillips, Sue Lewis, Michael Ellison, David Chinery for the boats. Bob Spagnoletti and Nick Povey for their work with the timing, Jacqui Phillips and Margaret Ball in the office. Fred Ball and Brian Wilkins for their help. Finally Phil and Sandra Gollop of the Weymouth & Portland Sailing Academy and Andy Fraser who provided the rescue cover during the week.

Bob Downhill

Photo courtesy of the Dorset Echo

Bob Downhill has been running Weymouth Speed Week for the last ten years, it is his tireless efforts throughout the year that give us this unique and most enjoyable event. In 2001 Bob announced that he would be stepping down from this task in future years, unfortunately, this time he really meant it. For 2002 Nick Povey and Bob Spagnoletti will take on the responsibility for organising the event, they look forward to your continued support.

Notes on the timing equipment

We were able this year to run two courses, a shore course along Chesil Beach and a Harbour course from boats.

We now have four Joddy boxes, Maxon radio links, laptop computers, 12 volt batteries and anemometers, all identical, which gives us flexibility in positioning starts and finishes and relocating courses with the minimum of disruption.

Bob Spagnoletti has made up stand-alone wind speed and direction recorders that capture information every 10 seconds throughout the day. These were used on the beach when the beach course was used. Results from these will appear on the web site when the calibrations are completed.

The fully automatic timing system using laser gates and radio relayed sail numbers is still in development and we are ever hopeful that the system will come into regular use soon.

An area still lacking is the presentation of results on the beach in real time to let everyone know what is going on. We do have an active display but the software is not yet stable enough.

The results of Weymouth Speed Week 2001

They are presented in date order with each days results presented in their entirety. When both the 500 metre harbour course and the 200 metre beach course have been run then the data is presented as two separate files.

it was decided by a vote of the competitors that the boats would take the fastest speed obtained on the 500 metre course to determine the fastest boat of the day. The boards would use the fastest speed regardless of which course.

At the start of the lists of results is a set of results for the week where all the runs have been combined to give a record of each competitors highest speed runs.

Wind speed plots are presented for each day.

At the end of the daily listings appears the rankings for the week. The rankings are calculated by awarding .7 points for a first, 2 points for a second, 3 points for a third place etc. 7 days results are considered and the best 5 days results for each individual are used to calculate the lowest points count. The other 2 days are discarded.

If a person records no runs on any particular day they are awarded one point more than the maximum number of people who did sail on that day.

MAXIMUM SPEED = 24.85 KNOTS BY SAIL NO 181

Total number of runs = 79

Rankings for the week

The rankings are calculated by awarding .7 points for a first, 2 points for a second, 3 points for a third place etc. 7 days results are considered and the best 5 days results for each individual are used to calculate the lowest points count. The other 2 days are discarded.

If a person records no runs on any particular day they are awarded one point more than the maximum number of people who did sail on that day.

Ranking

Run at 22:38:47 8th October 2001-10-08
